## Seat and Backrest Units

Seating and back units of the seats are manufactured from polyurethane material in aluminum molds designed in accordance with human anatomy, in compliance with 50 + - 10% density and Mvss 302 fire standards.

Inside the seat and back pads, there is durable steel frame.

Tip up mechanism works with gravity without any springs.

## Legs and Armrest Units

The foot unit of the seats are upholstered with laminated fabric or vinyl on 18 mm MDF plate.

Armrests are upholstered with laminated fabric or leather.

Seats share common arms in between.

The foot unit is fixed on floor are made of sheet steel thickness 6 mm.

Seats are fixed to the floor on two points for each leg.

## Fabric or Vinyl

Fabric or Vinyl used for upholstery is resistant to friction, fire and UV.

Seats and back units of the seats are upholstered completely with fabric or vinyl upholstered with specified specifications.

Our products have TS EN 12727 & TSE EN 13200-4 certificates and our company has ISO 9001:2015 Quality Management System.

Seat design is protected by Utility Model Registration and Petty Patent.
